Tools & Systems: Git, Visual Studio Code, Eclipse IDE, OTRS CRM, Windows, Linux, macOS, system imaging, AV troubleshooting

Professional Experience

Student Technical Assistant

May 2025 - Present

UToledo Online, University of Toledo, Toledo, OH

- Delivered Blackboard first-line technical support to students, faculty, and staff via phone, email, and live chat
- Diagnosed and resolved software, hardware, and network-related issues affecting UToledo Online operations
- Installed software updates, configured hardware, and managed system logs across multiple staff workstations
- Tracked all support efforts using OTRS CRM, documenting problems and resolutions in detail
- Provided evening and weekend support during Help Desk hours, demonstrating adaptability

IT Technician

Sep 2023 - Present

Classroom Support Services, University of Toledo

- Provided hands-on technical support for over 120 classrooms and office spaces
- Conducted PC audits and asset tracking to align with compliance requirements and support ISO 27001 readiness
- Deployed operating system images and configured new classroom computers with software packages
- Trained faculty and staff on university tech tools including projectors and video systems
- Collaborated with IT staff to roll out major upgrades and troubleshoot network outages

Software Engineering Fellow

Jul 2024 - Aug 2024

Headstarter, Remote

- Designed and developed 5+ AI-powered web applications and REST APIs using React, Next.js, HTML, CSS, and JavaScript
- Led feature development cycles from requirement gathering to deployment using Agile methodologies
- Integrated OpenAI/Llama APIs to enhance personalization, accuracy, and conversational UI elements

Software Engineering Fellow

Remote Jul 2024

Prodigy Infotech

- Completed 5 professional-grade web development projects using HTML, CSS, JavaScript, and responsive design
- Developed single-page applications and personal portfolios, receiving positive client feedback
- Participated in structured online training and mentoring sessions, refining frontend development practices

Projects & Hackathons

Well Together

RocketHack-25

- Tablet-based app for hospitalized patients integrating real-time journaling, video chat, and AI chatbot
- Built backend with Firebase Firestore and WebRTC, front-end using TypeScript and Next.js
- Enabled virtual companionship and emotional support during isolation, improving patient engagement

Invest-In-Box

- Developed a web app that automates stock reporting and delivers personalized investment summaries
- Frontend in React.js, backend in Python and SQL, integrated with Robinhood API for live market data
- Implemented email automation, user preferences, and data security features

Tech Market

- Created a professional networking platform with AI-based resume analysis and auto job-matching features
- Integrated Clerk for authentication and OpenAI for chat functionality
- Utilized Google Firebase for real-time user interactions and backend storage

Leadership & Activities

- Co-founder, Rockets Cricket Club:** Organized events for over 50 students, managing logistics, finances, and visual design to foster community involvement
- Social Media Lead, University of Toledo Engineering Council (UTEC):** Led digital strategy to promote technical and professional development events, enhancing student participation
